Sports Equipment Support Attachment

For Disabled Persons With

Hand Grip Disability

Sports Equipment Attachment

Do you find it hard to grip your fishing rod, golf club etc with your natural arm?

Have you had an accident that has affected the grip of your hand?

Have you had your hand amputated and no longer able to do your favourite sport?

Do you have arthritis affecting the grip in your hands?

Do you miss out in taking part in fun sports sessions with your friends?

If you have answered yes to any of the above questions, then 3rd Arm Sports Ltd have an attachment to fit your sports equipment, to allow you to return to the sport you loved, or allow you to try a sport you thought you would never be able to try.

The attachment have been made for the following sports

**Fishing
Golf
Table Tennis
Badminton
Squash
Snooker
Tennis
Hockey
Cricket
Cycling
Electric Buggies
Sub Aqua**

We are also looking at house hold items that it can be use on. From Golf to Cricket, these will on the market by the end of the year. We are currently working with the governing bodies of each sport, to make sure they can be used in competitions within the existing laws of the sport.

Fishing

The attachment can be fitted to any fishing rod, to enable disabled persons with a grip disability to still be able to their sport and be able to hold the rod comfortably. The fly rod also doubles as an excellent training aid, but along with the float rod would also allow able bodied persons to unhook and release the fish, re-bait and cast out without having to put the rod down.

The attachment is attached to the arm by way of Velcro straps (which can be handed) or rings to which you slide your arm into, or can be a combination of either. Carp and Beachcaster rods have rings on the attachment to allow the arm to slide in, strike and control the fish as normal. The attachment can also be fitted to landing net handles. Sport/spinning rod and boat rod fit on top of the forearm.
